

INDUCE INDIA

COMPANY PROFILE

ABOUT COMPANY

Since our inception in 2013, we have served as proficient technical advisors and consultants, dedicating our efforts to bolstering manufacturers' product quality. This commitment led to the establishment of 'INDUCE INDIA,' a platform singularly focused on this mission. Our journey began modestly, with a team of five adept professionals. Today, 'INDUCE INDIA' commands a workforce of over 80 seasoned full-time personnel, each meticulously trained and fervently dedicated to expediting licensing processes. Our team of adept experts collaborates directly with business proprietors, orchestrating the seamless integration of pivotal improvements that underpin enhanced business outcomes and drive progressive expansion. 'INDUCE INDIA' defies conventional consultancy norms, embodying a realm where visionary business insights converge with pragmatic execution strategies. Our resolute dedication to instigating positive transformation has firmly established our standing as trailblazers within the industry.

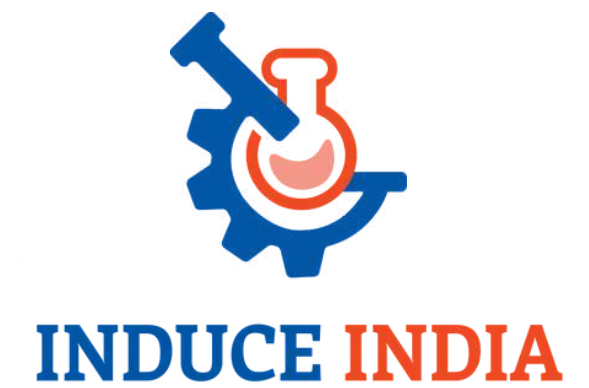

We give RESULTS NOT REPORTS.

INTRODUCTION

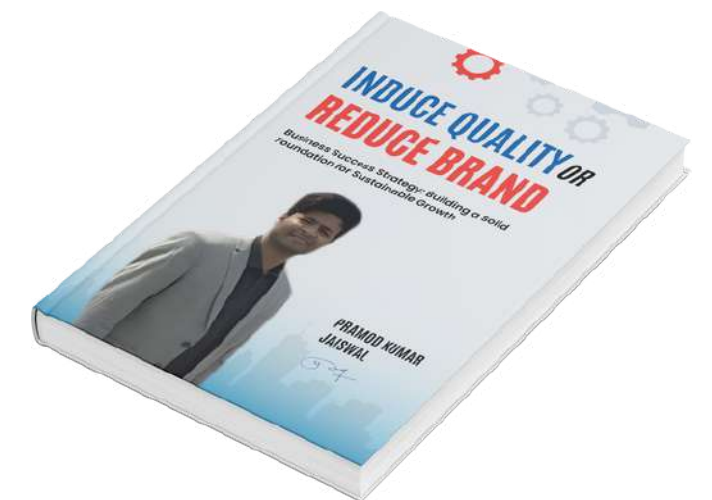

Pramod Kumar Jaiswal

Director & CEO, Induce INDIA

Pramod Kumar Jaiswal, holding a **B.Tech degree in Mechanical Engineering and an MBA in Finance**, has built a robust career spanning over **13 years** as a **BIS Consultant**. Specializing in helping both Indian and foreign manufacturers secure BIS (ISI) licenses, he has become a trusted expert in navigating the complex processes of certification. With a strong foundation in mechanical engineering and a deep understanding of finance, he offers end-to-end consultancy services that streamline the path to certification.

In addition to his extensive experience, Pramod Kumar Jaiswal is also the author of the book *Induce Quality or Reduce Brand*, where he emphasizes the critical role of quality in shaping a company's reputation and success.

INTRODUCTION

Dr. Baskar A.

Ex. Deputy Director (Scientist C), BIS

Principal Advisor at INDUCE INDIA

Dr. Baskar A. is a renowned mechanical engineer and academic leader with over 40 years of diverse experience in industry, academia, and research. He earned his PhD from VIT University in Flow Shop Scheduling Problems and has been recognized for his innovative contributions to mechanical engineering and operations research. Over his career, Dr. Baskar has worked in **Bureau of Indian Standards (Govt. of India) as Ex. Deputy Director (Scientist C)** and some other leading organizations, including NELCO Ltd. (A Tata Company) and several top-tier engineering institutions, where he has held positions such as Professor and Head of Department.

With his vast experience and deep technical knowledge, Dr. Baskar is set to play a pivotal role as the **Principal Advisor at INDUCE INDIA**, where he will lead high-impact projects, mentor teams, and drive innovations in engineering and technology. His unique blend of industry, research, and academic expertise makes him an invaluable asset to the organization's mission of fostering technological advancements.

- **Food and Agriculture**
- **Chemical Industries**
- **Plywood Industries**
- **Textile Industries**
- **Glass Industries Civil Engineering**

LICESNE CERTIFICATE

INDUCE INDIA

BIS ISI Mark Licence

The ISI (Indian Standards Institute) mark license is a certification granted by the Bureau of Indian Standards (BIS) to manufacturers whose products comply with Indian quality and safety standards. It is mandatory for certain products like electrical appliances, cement, and bottled water, and voluntary for others.

BIS FMCS License

FMCS, or Foreign Manufacturers Certification Scheme, is a program that operates under BIS authorization. Under the BIS Act of 2016 and the Bureau of Indian Standards (Conformity Assessment) Regulation of 2018, it is made available to foreign producers. Products that fulfill the required Indian criteria are eligible for this licence, which has been issued.

HUID Hallmarking Registration

The hallmarking plan's major objectives are to safeguard consumers against adulteration and to compel producers to adhere to regulatory fineness requirements. At the moment, hallmarking in India is under the control of two precious metals, gold, and silver.

REGISTRATION

CRS Registration

In 2012, the Department of Electronics and Information Technology (DeitY) introduced the Compulsory Registration Scheme (CRS) jointly with the Bureau of Indian Standards (BIS). The CRS scheme requires registration for electronics and IT products before launching them into the market.

WPC ETA Approvals

The National Radio Regulatory Authority, or WPC, is in charge of policing the radio spectrum. To meet the demands of users of wireless technology, WPC Office grants the WPC License (ETA) for electronic and IT goods.

BEE Certification

The Energy Efficiency Bureau of India bestows BEE accreditation on producers of electronic and electrical equipment. To do this, the Office of Energy Efficiency Certification examines the energy efficiency of equipment before assigning them to the BEE energy efficiency class.

REGISTRATION

INDUCE INDIA

EPR Registration

Every maker of Electrical and Electronic Equipment (EEE) has extended producer responsibility (EPR). This is to ensure the correct treatment and disposal of e-waste by directing it to a licensed dismantler/recycler.

UL Certification

One of the first organizations to offer safety certification is Underwriter Laboratories (UL). They certify goods based on industry-wide standards for factories, procedures, or systems. For a wide range of categories, they provide more than twenty separate UL certifications.

TAC Approval

Type Approval Certificate(TAC) includes many tests to ensure that the vehicle meets the required standards. For a product, it is important to have TAC certification before the introduction into the market because TAC Approval or certificate is authorized by the Ministry of Road Transport and Highways to meet the required standards.

OUR SERVICES

Major Categories of our Services:

Standardization and Certification

Laboratory Installation

Quality Management System

Internal Quality Audit

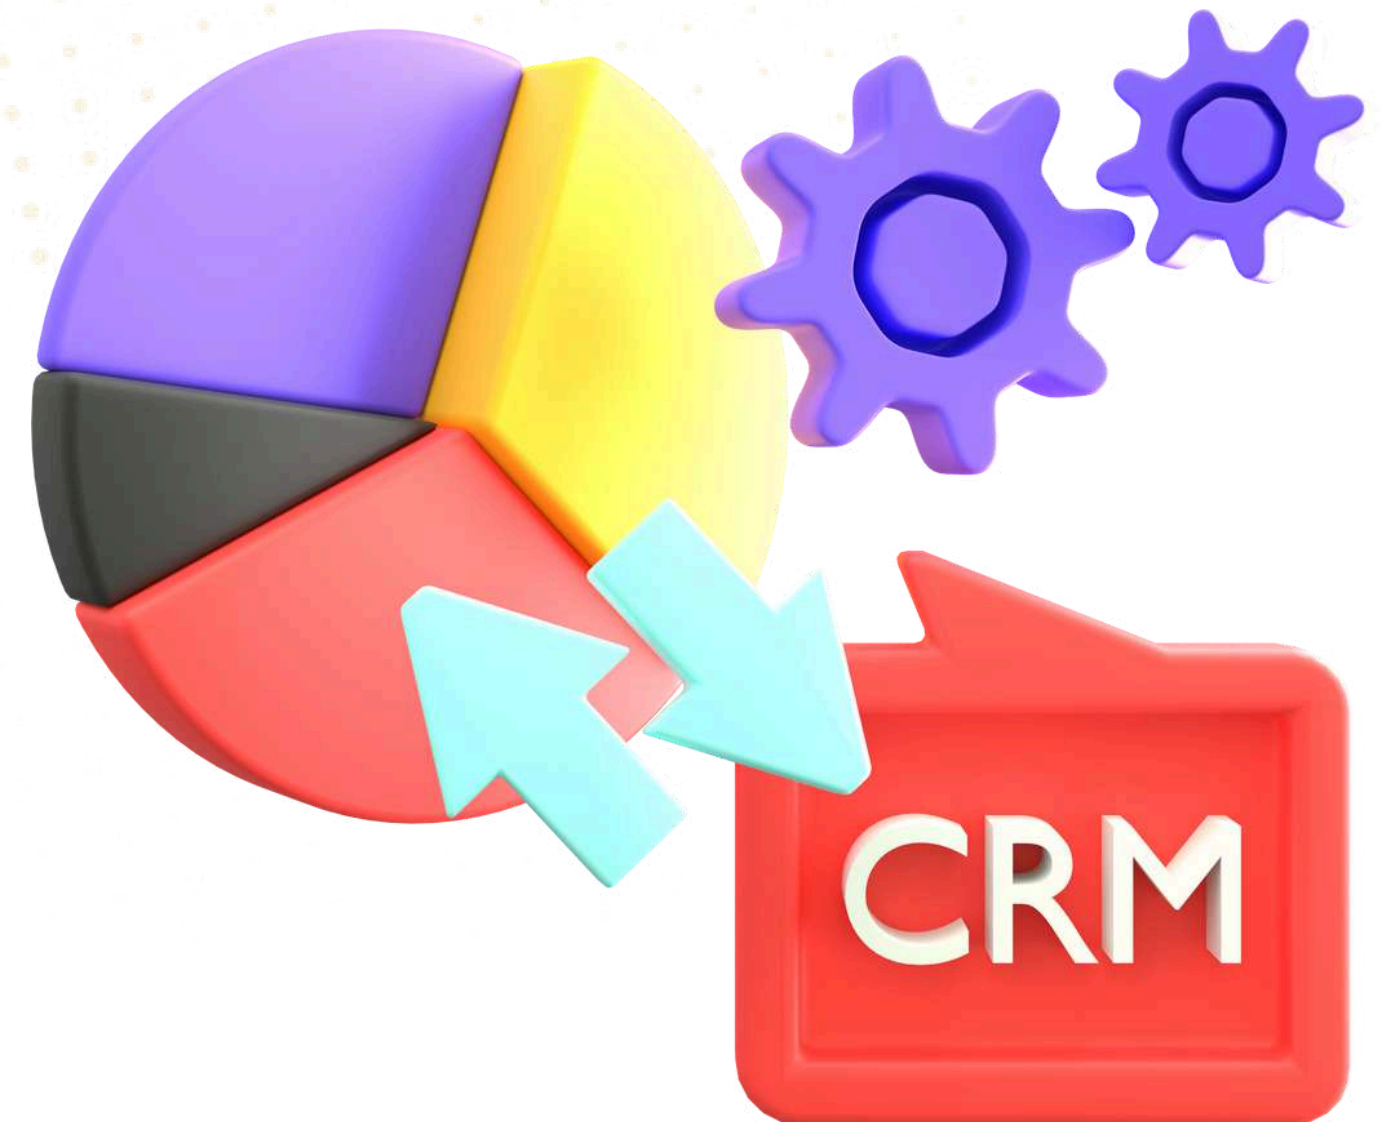

Training Services

PROJECT MANAGEMENT

How We Work

CRM System

ISI (Indian Standards Institute) Certification

This mark is basically recognised for the standard industrial products in India. For electronic products, it is mandatory to have an ISI Mark. ISI certification not only helps in growth of business but also promotes consumers' safety and quality of products, etc.
